

ORCHESTRA Data Management

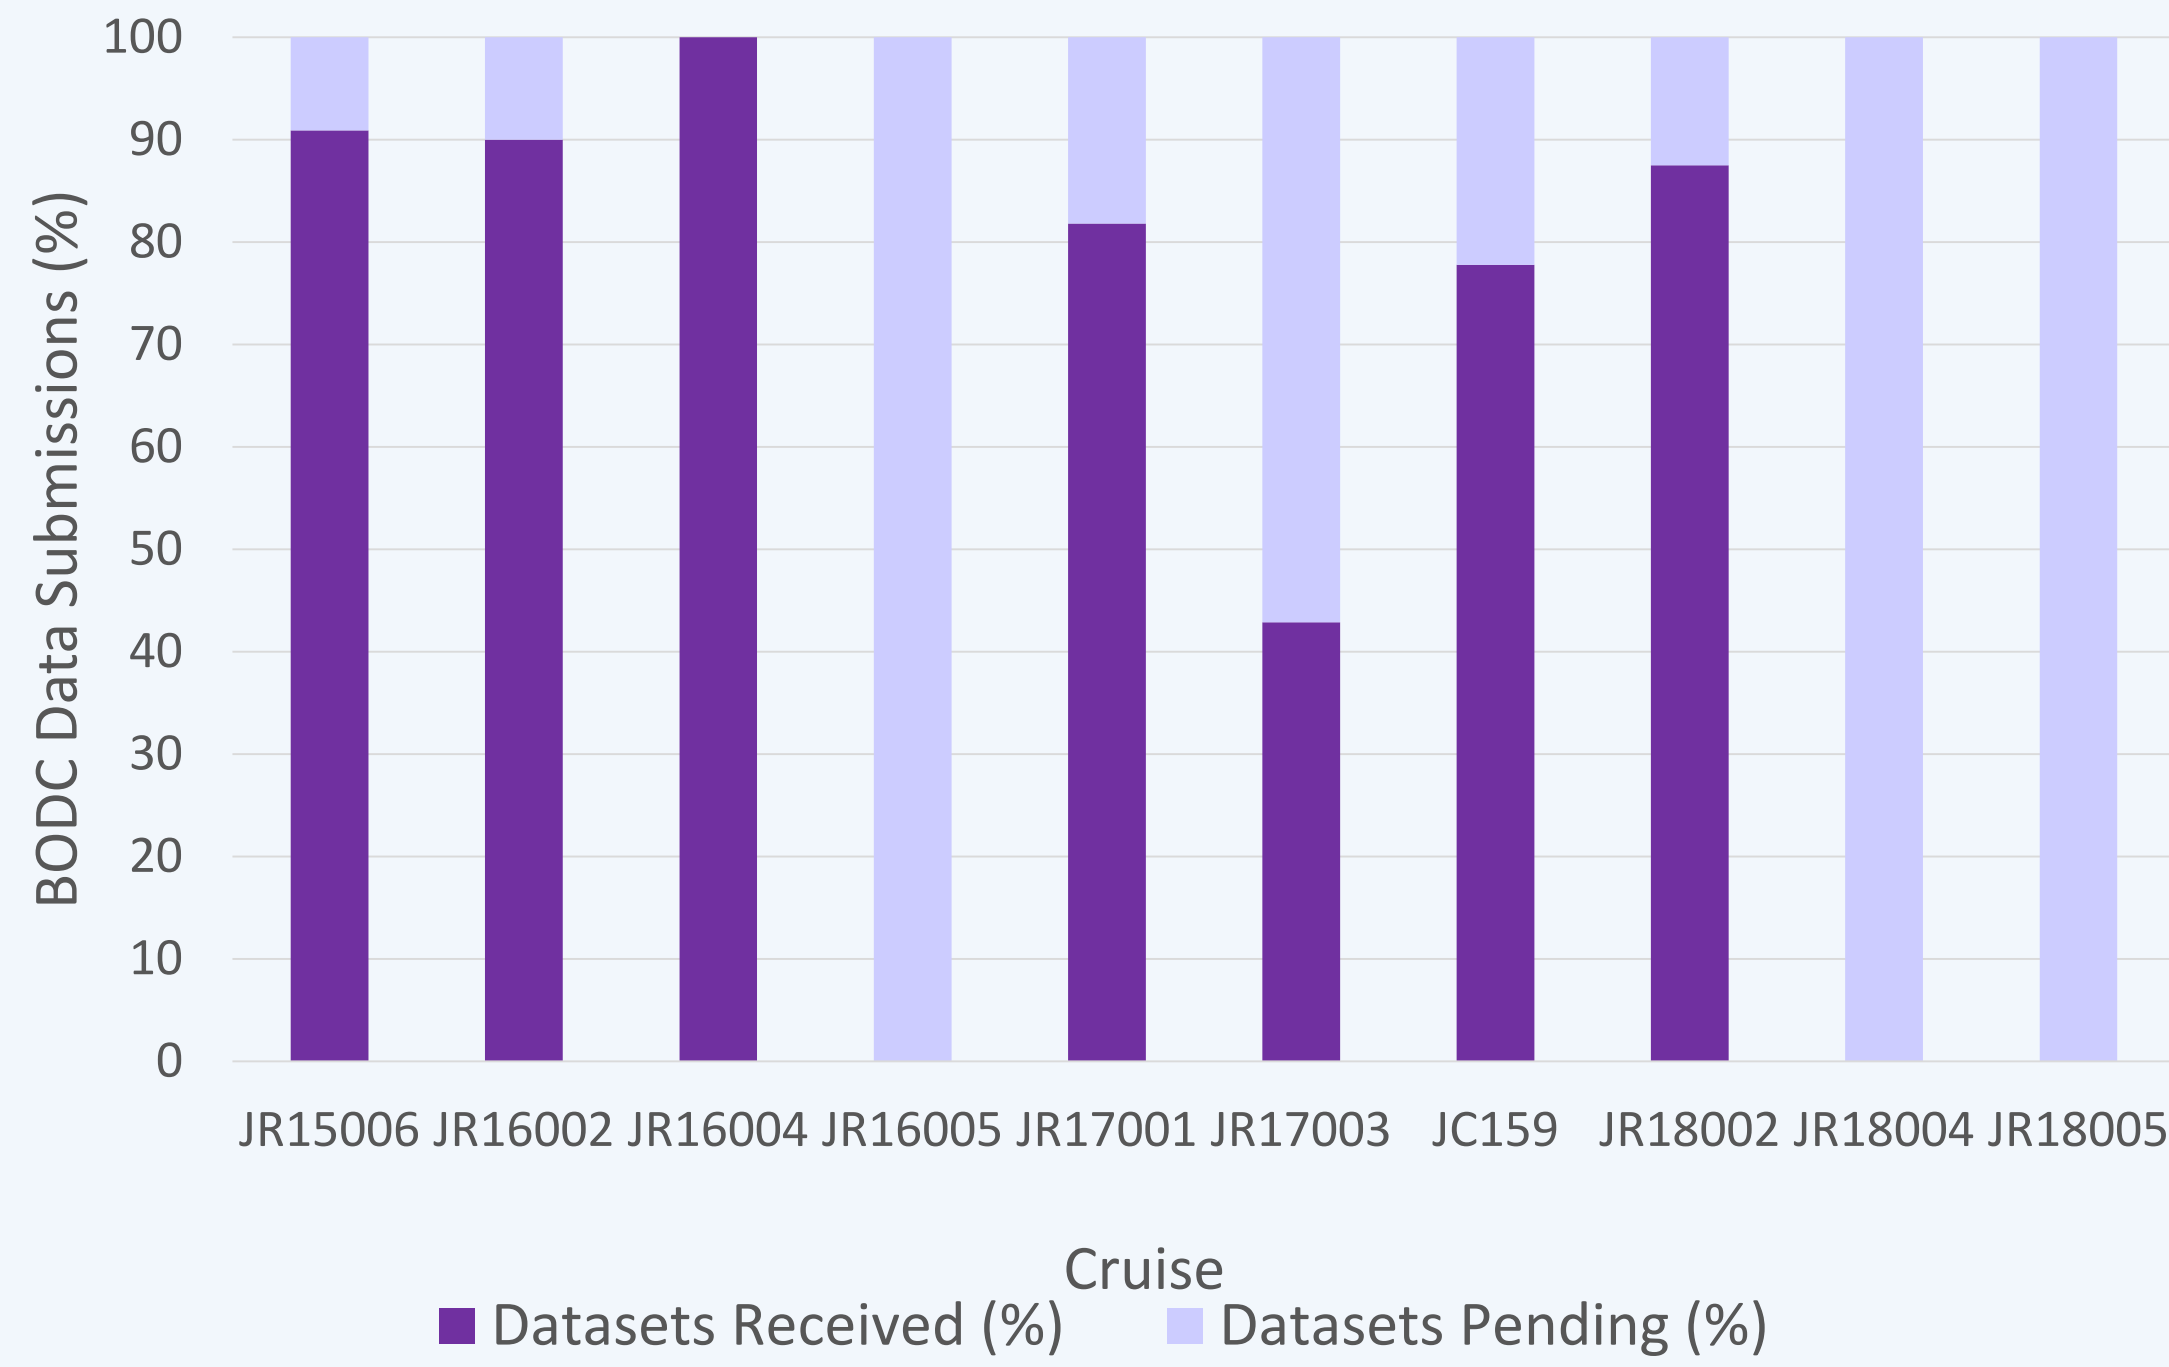

British Oceanographic Data Centre
NATURAL ENVIRONMENT RESEARCH COUNCIL

Sarah Chapman, British Oceanographic Data Centre, sarcha@bodc.ac.uk
Joana Beja, British Oceanographic Data Centre, joja@bodc.ac.uk

Data Submissions

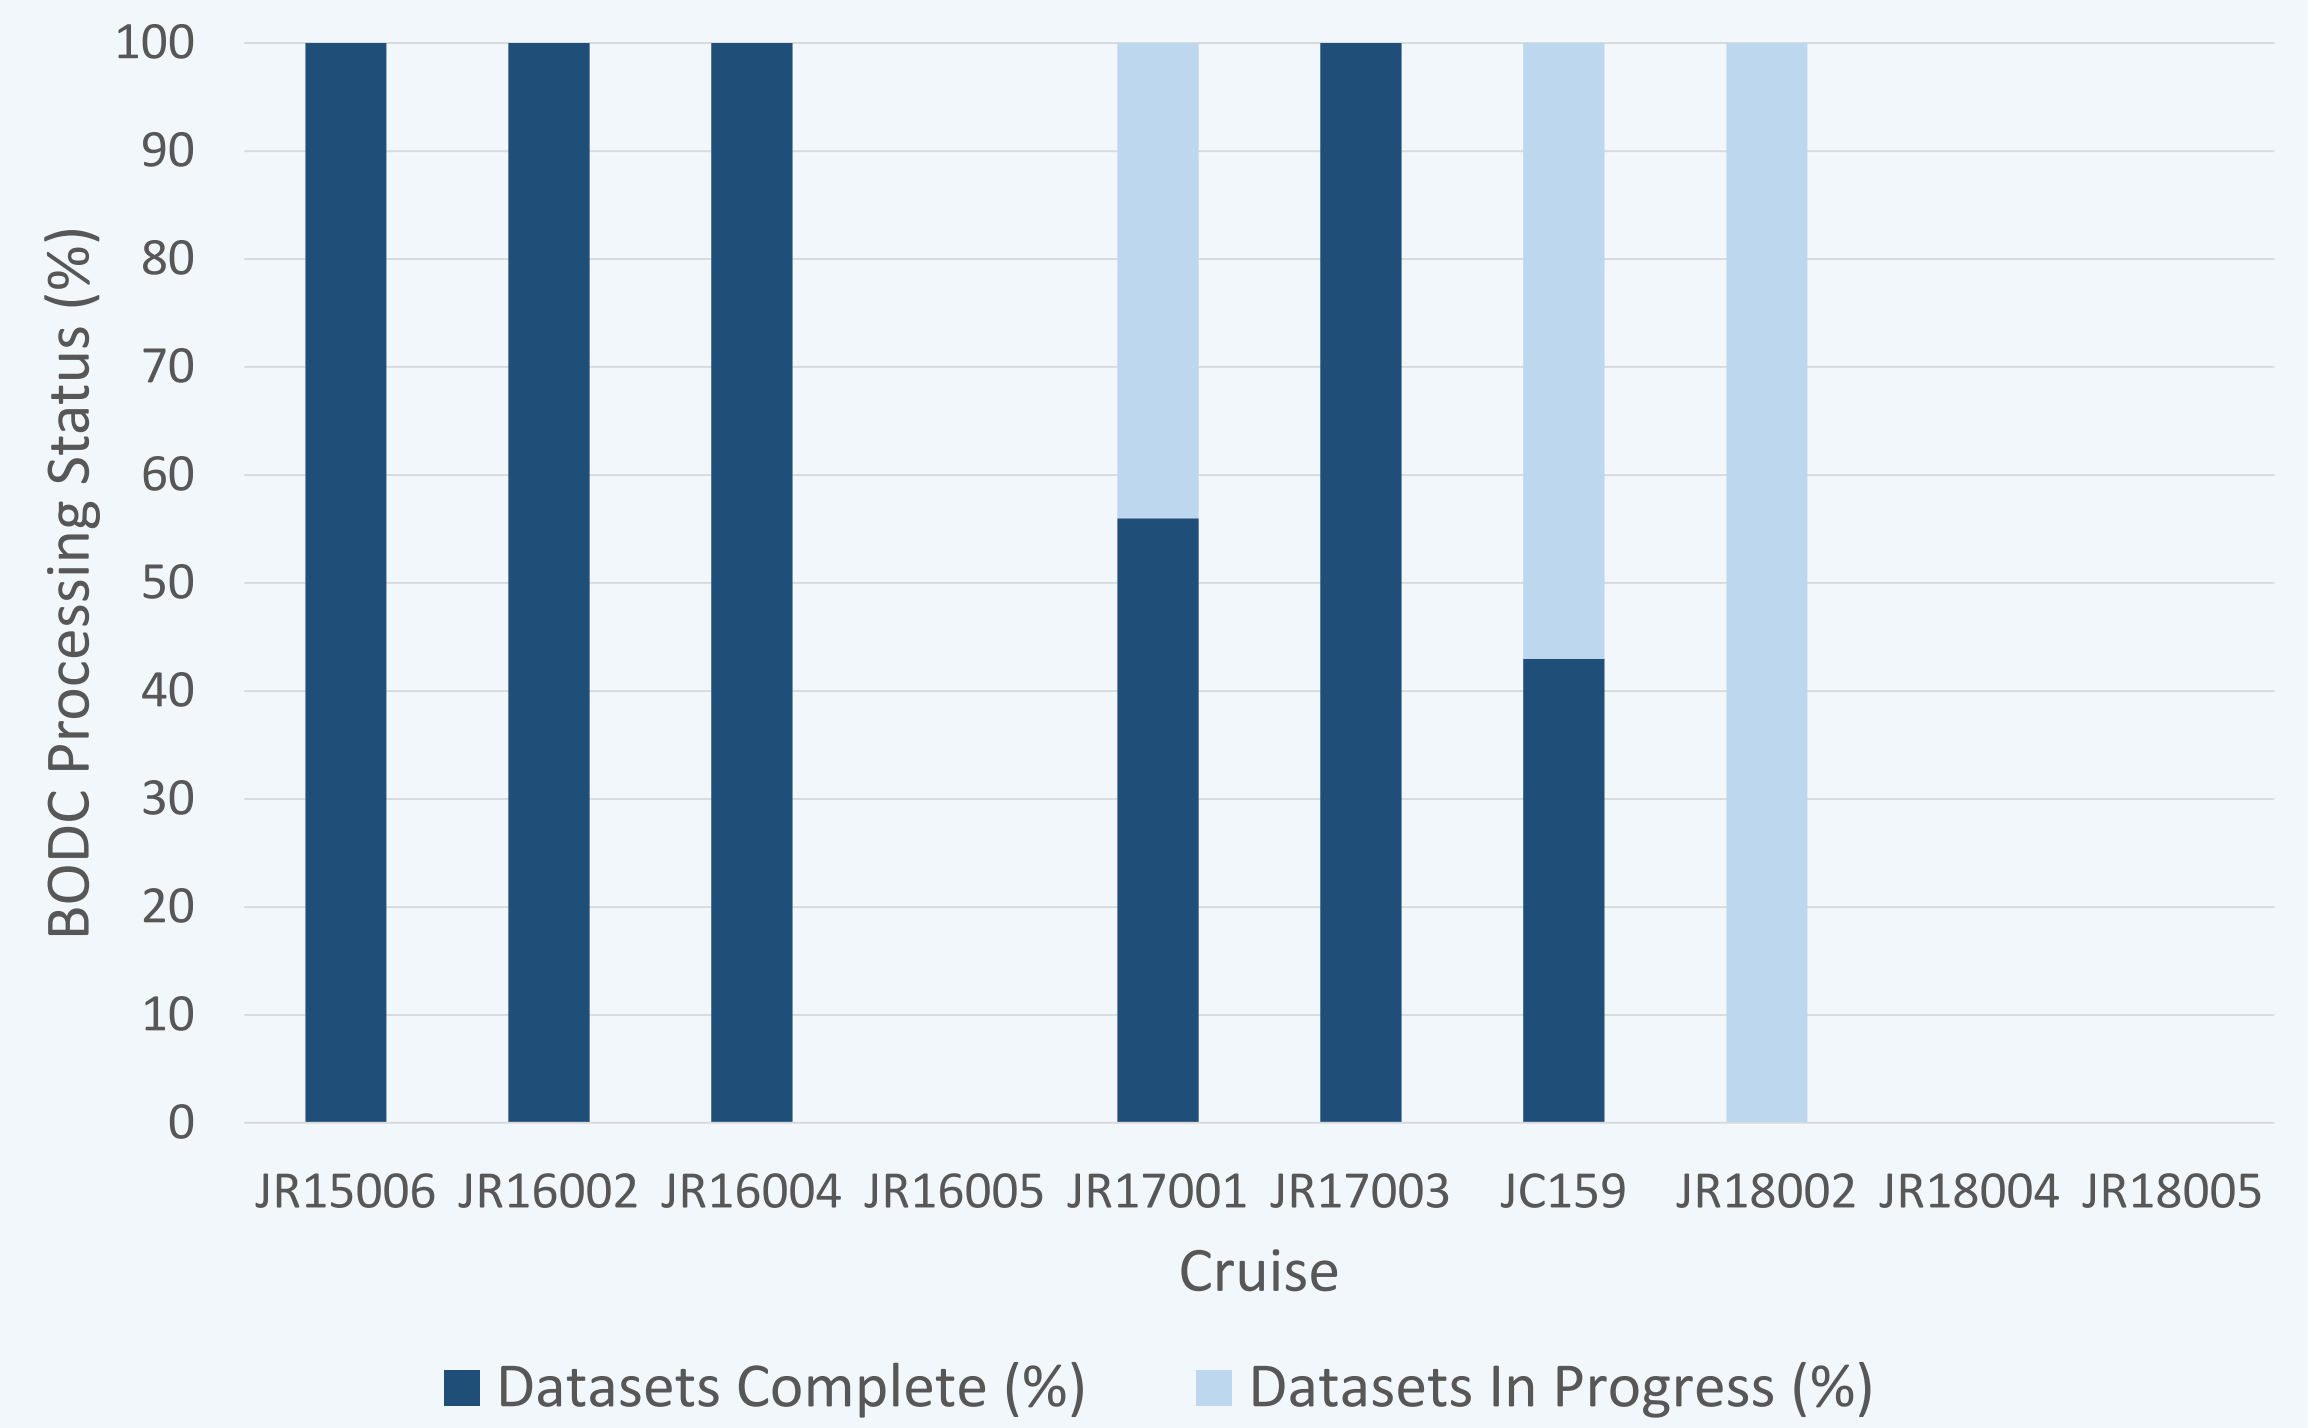

*Not including CEDA aircraft and model submissions

- BODC have received 32% of all expected data submissions.
- JR16005 mooring datasets account for 47% of pending datasets.
- 18/19 season datasets (15%) are not expected until later in 2019.
- Remaining 6% of datasets are overdue the agreed submission dates.

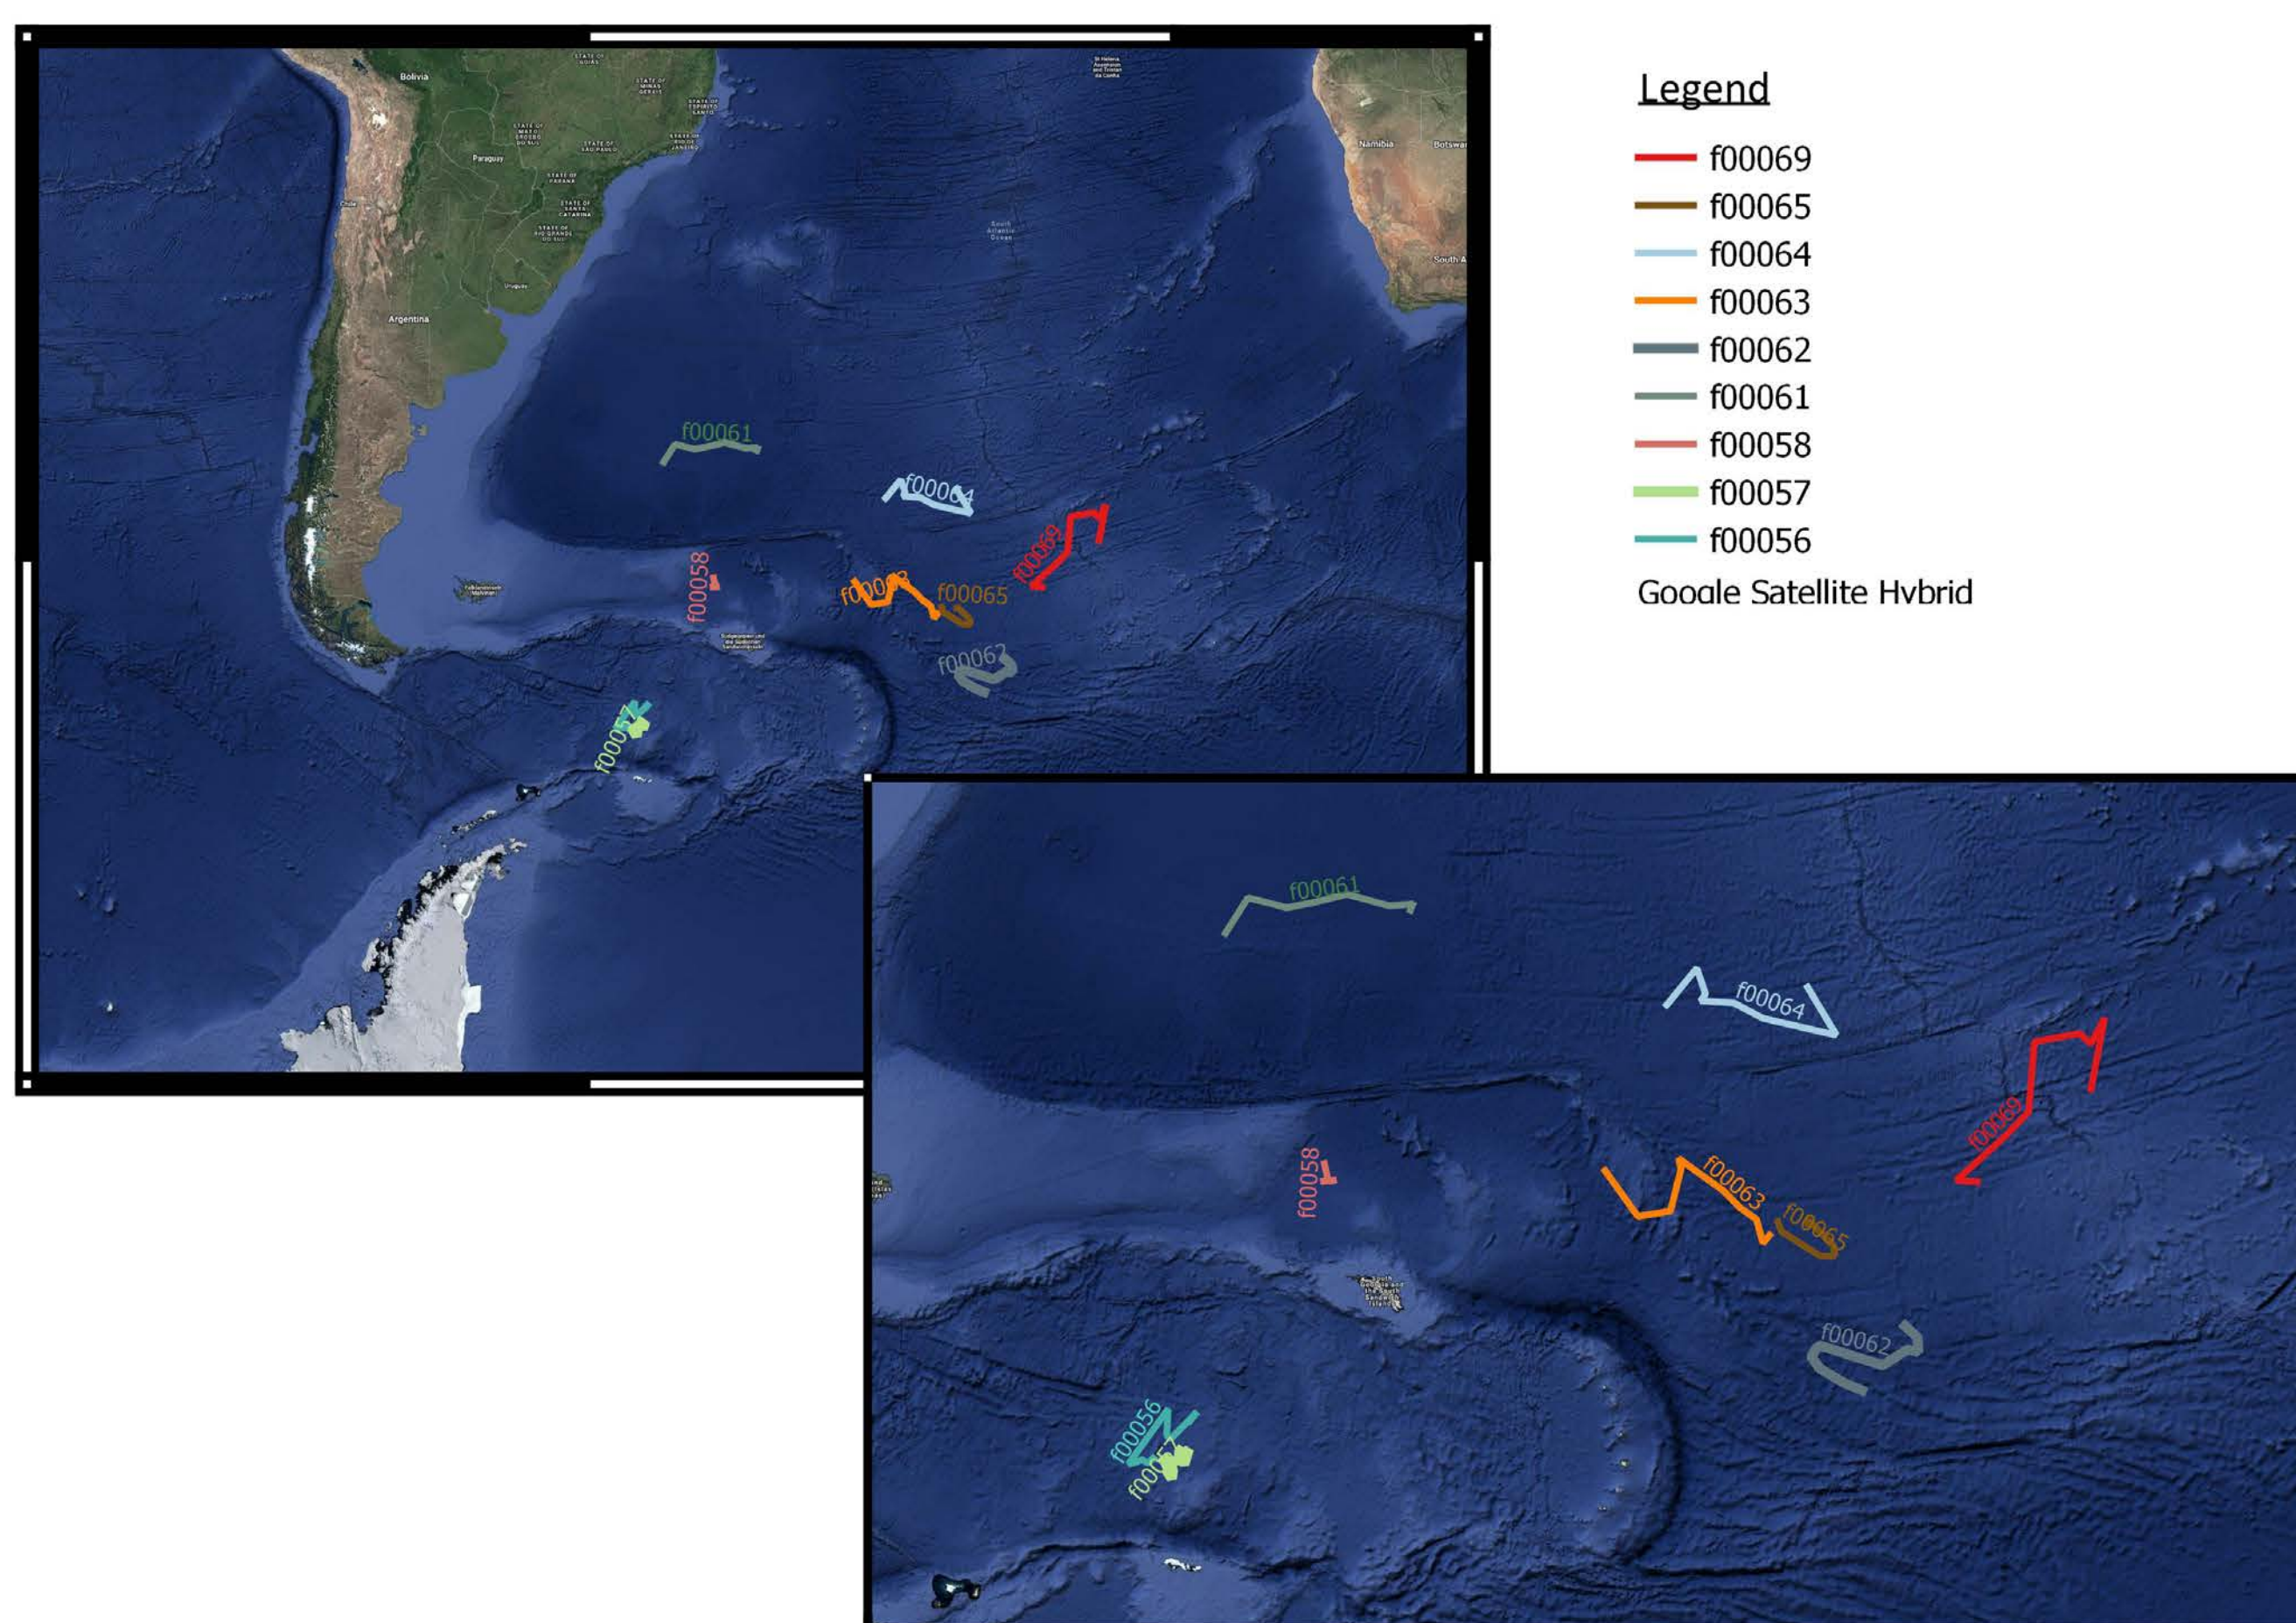

BODC Ingestion Status

*for received datasets

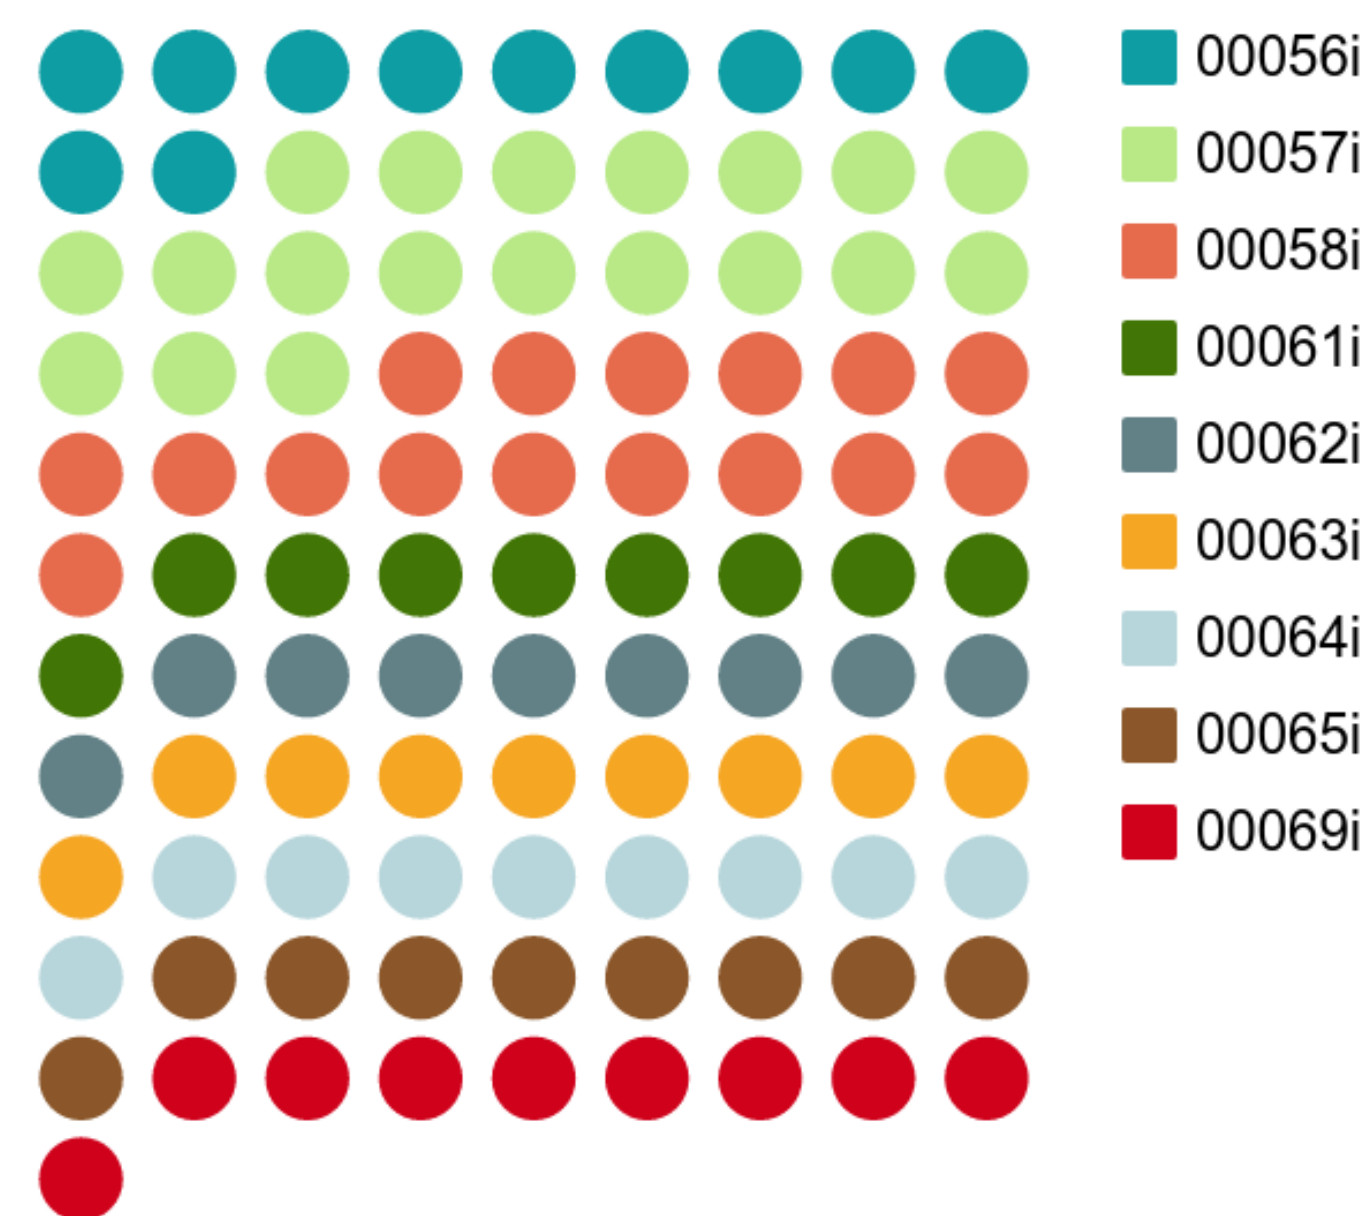

- 4 cruises are 100% complete and can be discovered online.
- JR17001 and JC159 datasets are still in progress.

Argo Float Update

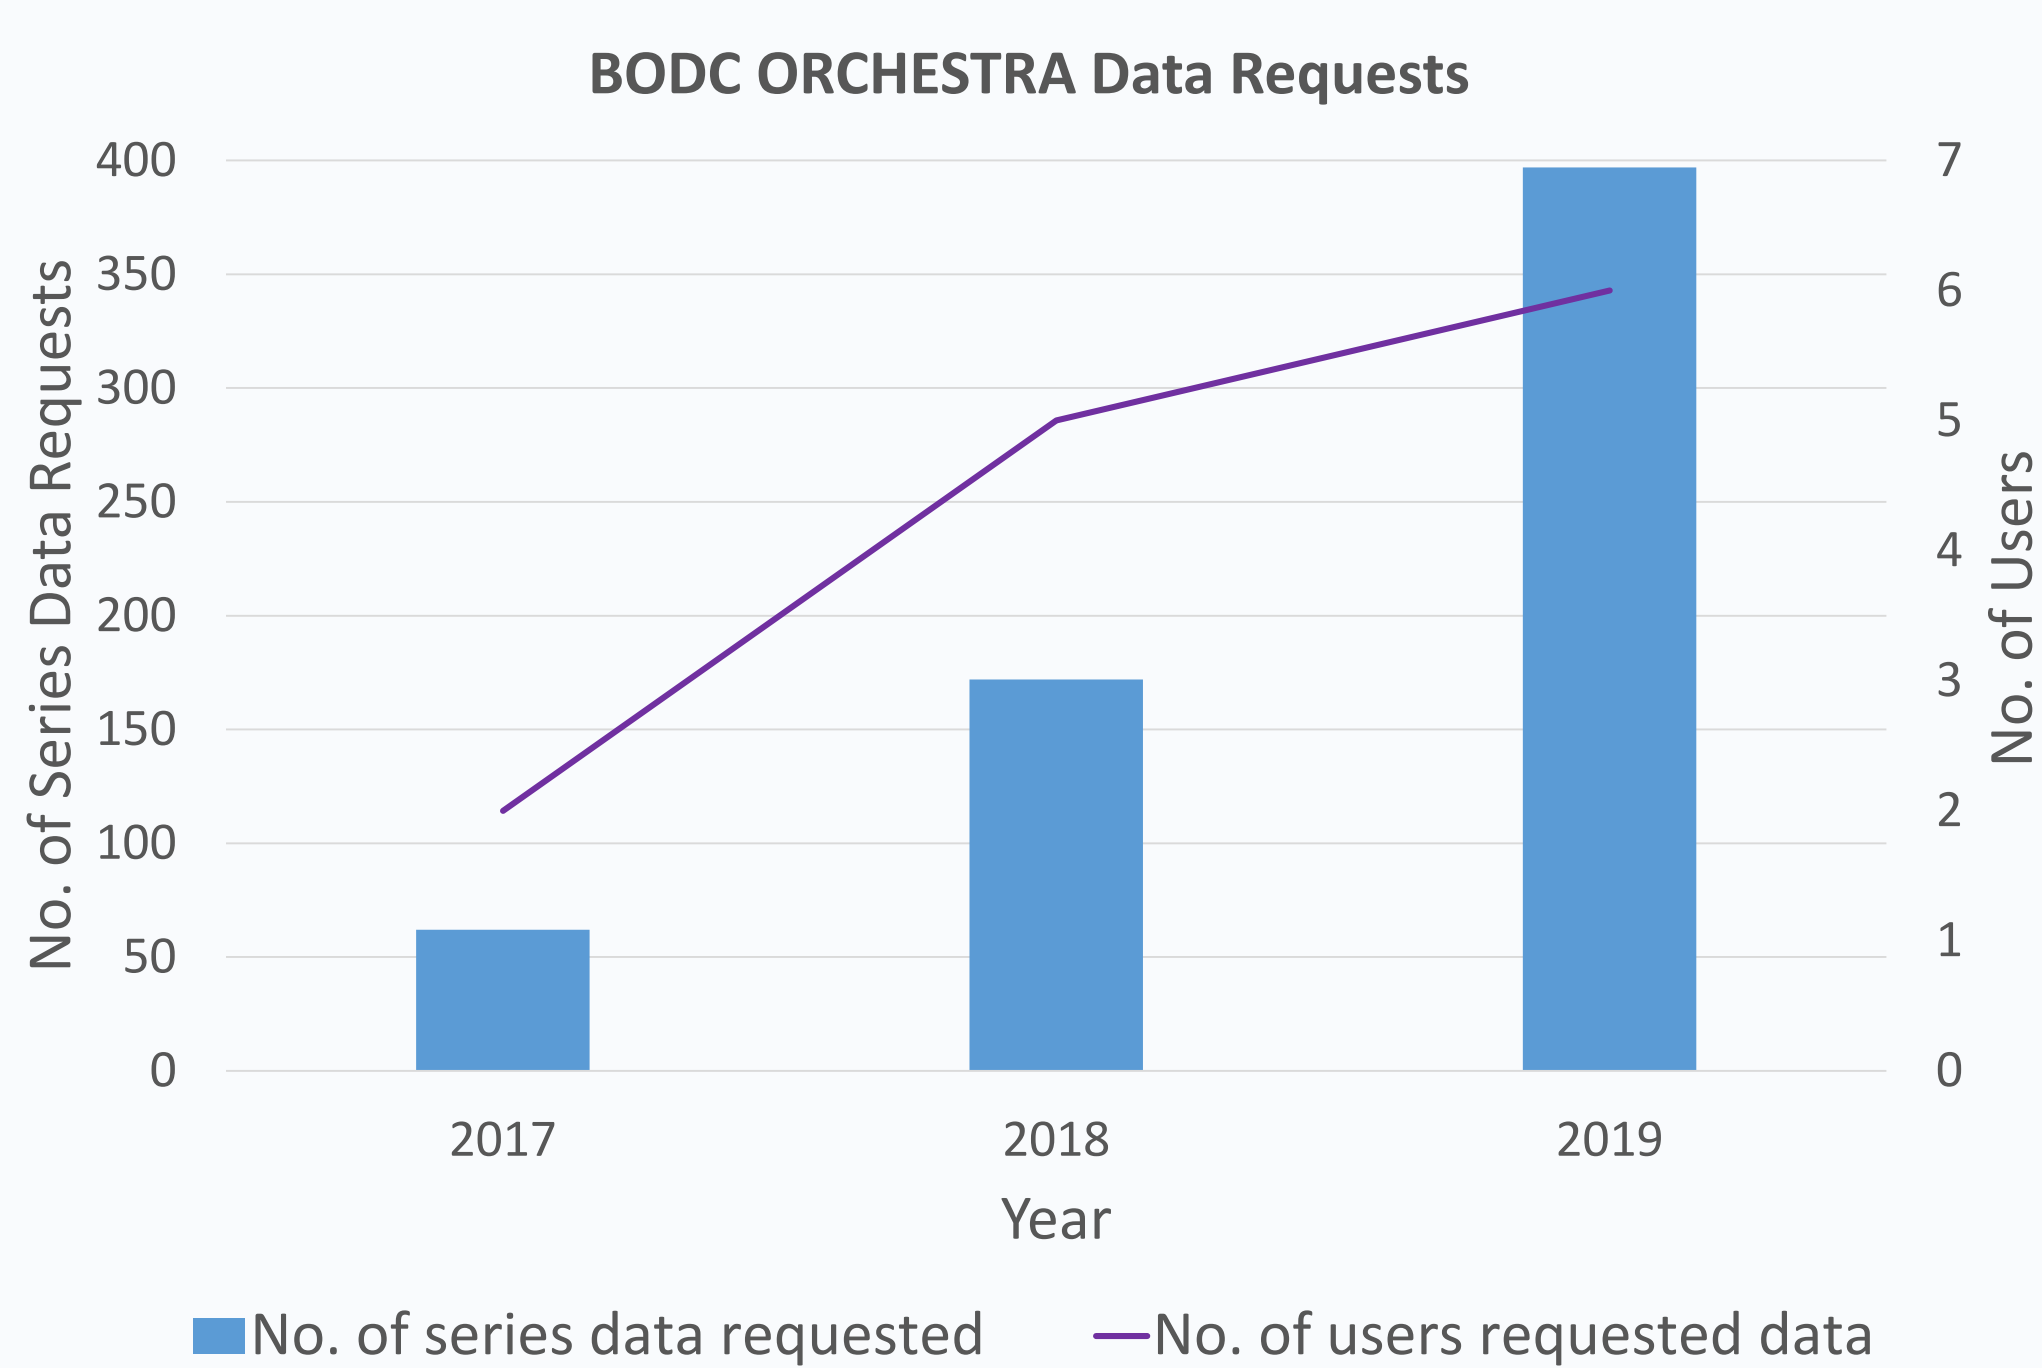

% of Argo Profiles

BODC Float Number	Deployment Date
00056i	17-Dec-2017
00057i	16-Dec-2017
00058i	17-Dec-2017
00061i	15-Nov-2017
00062i	15-Nov-2017
00063i	15-Nov-2017
00064i	15-Nov-2017
00065i	15-Nov-2017
00069i	15-Nov-2017

An additional 4 floats were deployed but failed to collect any profile data.

User Request Statistics

- Series data requests have increased year on year.
- 1 series data request = 1 data file downloaded.
- Approximately 65% of all requests were for restricted data.
- ORCHESTRA data is generating significant interest within the wider community.

Digital Object Identifiers (DOIs)

DOIs minted by BODC = 0%

What are the benefits of a DOI?

Credit

Reproducibility

Integrity

Increasingly a requirement for journals

BODC provide a quality DOI service to allow you to cite your data in journal publications. Scan to discover more about this service.
